HOUSEKEEPING SKILL

Housekeeping skill is the special knowledge and techniques/method that one use to keep a house clean, well maintained and organised.

Housekeeping answers the question, ''how do you make sure that everything in the house is in usable condition, that none of the object are broken or chipped and fabrics are not turn, that all the fixture like taps, geysers, electric wiring, bulbs, tubs, fans, plug points, are in good working condition?'' Thus we can say, the different procedure followed to keep and maintain everything in the house in good presentable condition/order, are collectively known as good housekeeping.

A person who carries out housekeeping duties or service is called a Housekeeper. Locally or informally they are called cleaners.

The workshop of housekeeper in house. He/she takes good record of the surface and material in the house and know how to clean and maintain them or manage their maintenance.
