INTRODUCTION TO TEACHING SKILL

Teaching skill is the collection of techniques that are used to pass on or impart knowledge to a person. Other words implying teaching are instructing, educating, train, discipline, impart, inculcate, etc.

Humans are the main materials that are processed into products in this skill. Conventional tools used in this skill include a board and marker or chalk, papers, charts, audios, videos, etc. A major important universal equipment needed in the teaching skill is a complete functional computer system with important peripheral devices like scanner, microphones, camera, projector, etc.

A person who teaches is called a teacher. There is no special dress for teaching; however, the kind of lessons to teach warrants a particular kind of dressing both as safety and artistic purposes. For example, teaching Physics in a laboratory mandates the need for a laboratory safety wear collection. Notwithstanding, a teacher ought to be adorned in a neat, well smelling, modest formal clothing.

The teaching skill can be developed in a classroom. A typical classroom contains a board, chalk/marker, desk, table, and charts. It might also contain shelves that contain books and a cupboard to be used to keep the various tools and materials used in the skill.
