LESSON PLANNING

Lesson planning is the tailoring of lessons to agree or support the curriculum/scheme of work. In essence, the making of a lesson plan aims to achieve the objectives of the curriculum.

The scheme of work suggests how topics should be laid out. For example: the topic "Introduction to Arts: History; Origin and Types" is aimed at achieving the following performance objectives: definition of art, history and origin of art (early men and Nigeria), categories/types of art (textile design, ceramics, design, graphics design, aesthetics. As such when developing such topic, it ought to be developed to deal with the performance objectives.
