THE CASE OF SCHOOL'S TERM CALENDAR

Just as an academic session is divided into terms, so also, is a term divided into weeks. The term's calendar is the calendar that contains the weeks of the term against their description. The description tells what should be done in a particular week. For example, week 1 is the resumption and school cleanup day, week 3 is normal lessons and fees drive, week 10 is revision or exams, etc.

The school term's calendar helps to organize the term in such a way that it could run most properly to meet date deadlines in terms of some activities of the term such as examination, mid test, fees drive, excursion, party, etc. It also helps students and staff to plan properly to give their best performance in the term.
