ELECTRICAL WORKSHOP

Electrical workshop is the room or building where electrical works or projects can be done or developed. It particularly consists of special electrical fixtures and also, the general fixtures of a workshop.

The general fixtures found in a typical workshop is a workbench (or bench top), cupboard for tools and equipment, shelf for containing different kinds of electrical materials and also, shelf for electrical literatures.

Special fixtures needed in an electrical workshop include testing board, voltage, current, and resistance measurement facility (multimeter), etc.
