EXPLORING THE TOOL FLYOUTS

Flyouts open to display a set of related CorelDraw tools. A small arrow in the bottom, right corner of the toolbox button indicates a flyout. For example, the Shape edit flyout. Clicking and dragging the grab handles at the end of the flyout sets the flyout in its expanded form.

Below are flyout names and their corresponding tools.

Flyouts	Tools
Shape edit	Shape, Smudge Brush, Roughen brush, and Free transform tools
Crop tool	Crop, Knife, Eraser, and Virtual segment delete tools
