EXPLORING THE TOOLBOX

Tools exist in CorelDraw. They are used in making graphic files. They are contained in the toolbox and are grouped in flyouts. Below are tools in CorelDraw and their descriptions:

Tools	Description
Pick tool 	The Pick tool lets you select and size, skew, and rotate objects.
Shape tool 	The Shape tool lets you edit the shape of objects
Smudge brush 	The Smudge brush
Roughen brush 	The Roughen brush tool lets you distort the outline of a vector object by dragging along the outline
Free transform 	The Free transform tool lets you transform an object by using the Free rotation, Angle rotation, Scale and Skew tools
Crop tool 	This crop tool lets you remove unwanted areas in objects
Knife tool 	The Knife tool lets you cut through objects

Eraser tool 	The Eraser tool lets you remove areas of your drawing
Virtual Segment Delete 	The Virtual Segment Delete tool lets you delete portions of objects that are between intersections
Zoom tool 	The Zoom tool lets you change the magnification level in the drawing window
Hand tool 	The Hand tool lets you control which part of the drawing is visible in the drawing window
Freehand tool 	The Freehand tool lets you draw single line segments and curves
Bézier tool 	The Bézier tool lets you draw a single line segment at a time
Artistic media tool 	The Artistic media tool provide access to the Brush, Sprayer, Calligraphic, and Pressure tool
Pen tool 	The Pen tool lets you draw curves one segment at a time
Polyline tool 	The Polyline tool lets you draw lines and curves in preview mode
3-Point curve 	The 3-Point curve tool lets you draw a curve by defining the start, end, and centre points

Interactive Connector 	The Interactive Connector tool lets you join two objects with a line
Dimension tool 	The Dimension tool lets you draw vertical, horizontal, slanted or angular dimension lines
Smart Fill tool 	The Smart Fill tool lets you create objects from enclosed areas and then apply a fill to those objects
Smart Drawing tool 	The Smart Drawing tool converts the freehand strokes that you draw to basic shapes and smoothed curves
Rectangle tool 	The Rectangle tool lets you draw Rectangles and squares
3-Point Rectangle tool 	3-Point Rectangle tool lets you draw rectangles at an angle
Ellipse tool 	The Ellipse tool lets you draw ellipses and circles
3-Point Ellipse tool 	The 3-Point Ellipse tool lets you draw ellipses at an angle
Polygon tool 	The Polygon lets you draw symmetrical polygons and stars
Star tool 	The Star tool lets you draw perfect stars

Complex Star tool 	The Complex Star tool lets you draw complex stars that have intersecting sides
Graph Paper tool 	The Graph Paper tool lets you draw a grid of lines similar to that on graph paper
Spiral tool 	The Spiral tool lets you draw symmetrical and logarithmic spirals
Basic Shapes tool 	The Basic Shapes tool lets you choose from a full set of shapes, including hexagram, a smiley face, and a right-angle triangle
Arrow Shapes tool 	The Arrow Shapes tool lets you draw arrows of various shapes, direction, and number of heads
Flowchart Shapes tool 	The Flowchart Shapes tool lets you draw flowchart symbols
Banner Shapes tool 	The Banner Shapes tool lets you draw ribbon objects and explosion shapes
Callout Shapes tool 	The Callout Shapes tool lets you draw callouts and labels
Text tool 	The Text tool lets you type words directly on the screen as artistic or paragraph text

Interactive Blend 	The Interactive Blend tool lets you blend two objects
Interactive Contour 	The Interactive Contour tool lets you apply a contour to an object
Interactive Distortion tool 	The Interactive Distortion tool lets you apply a Pus or Pull distortion, a Zipper distortion, or a Twister distortion to an object
Interactive Drop Shadow 	The Interactive Drop Shadow tool lets you apply a drop shadow to an object
Interactive Envelope tool 	The Interactive Envelope tool lets you distort an object by dragging the nodes of the envelope
Interactive Extrude 	The Interactive Extrude tool lets you apply the illusion of depth to objects
Interactive Transparency 	The Interactive Transparency tool lets you apply transparencies to objects
Eyedropper tool 	The Eyedropper tool lets you select and copy object properties, such as fill, line thickness, size, and effects from an object on the drawing window

Paintbucket tool 	The Paintbucket tool lets you apply object properties, such as fill, line thickness, size, and effects to an object in the drawing window after you select these properties with the Eyedropper tool
Outline tool 	The Outline tool lets you set outline properties
Fill tool 	The Fill tool lets you set the fill properties
Interactive Fill tool 	The Interactive Fill tool lets you apply various fill
Interactive Mesh tool 	Interactive Mesh tool lets you apply a mesh grid to an object
