Dropdowns in Bootstrap

A dropdown menu is a list-group or div group menu that appears when a user clicks a button. To create a dropdown button we use the .dropdown class with the button tag. The dropdown button would be contained in a div with class .dropdown. The dropdown div would also contain the menu that comes up when the dropdown button is click. The menu is created with a div tag with class .dropdown-menu, and each link button on the menu is created with an <a> tag with class = ".dropdown-item".

```
<div class="dropdown">
 <button class="btn btn-primary dropdown-
toggle" data-toggle="dropdown">Foods</button>
 <div class="dropdown-menu">
  <a class="dropdown-item">Garri and Soup
</a>
  <a class="dropdown-item">Rice and Chicken
</a>
  <a class="dropdown-item">Yam and Peppersoup
</a>
</div>
```

Note that .dropdown-toggle class and data-toggle= “dropdown” attribute were added to the dropdown button element so that it shows the dropdown menu when clicked.
