Carousels in Bootstrap

A carousel is a slideshow for cycling through element. The classes used to create a carousel (slideshow section) in bootstrap are:

Class	Description
.carousel	Creates a carousel
.carousel-indicators	Adds indicators for the carousel. These are the little dots at the bottom of each slide that indicates how many slides are there in the carousel and which slide the user is currently viewing.
.carousel-inner	Adds slides to the carousel
.carousel-item	Specifies the content of each slide
.carousel-control-prve	Adds a left (previous) button to the carousel, which allows the user to go back between the slides
.carousel-control-next	Adds a right (next) button to the carousel, which allows the user to go forward between the slides.

.carousel-control-prev-icon	Used together with .carousel-control-prev to create a ”previous” button.
.carousel-control-next-icon	Used together with .carousel-control-next to create a ”next” button.
.slide	Adds a CSS transition and animation effect when sliding from one item to the next.
.carousel-caption	Adds caption within each .carousel-item.
